PROFESSIONAL EXPERIENCE

Project Coordinator | Decon Controls | Toronto, ON 2025 – Present

- Analyzed enterprise data from multiple internal systems to identify data quality issues, gaps, and inconsistencies, proactively raising risks to stakeholders.
- Developed and optimized SQL queries — including joins and aggregations — to investigate trends, answer business questions, and support reporting requirements.
- Performed data mapping and schema analysis for new and existing data ingestion initiatives within a data warehouse environment.
- Supported Power BI dashboards and analytical outputs, enabling business stakeholders to monitor KPIs and operational performance.
- Coordinated cross-functional data flow, extraction, and transformation processes, ensuring data accuracy and audit readiness across project schedules and compliance tracking.
- Managed multiple concurrent reporting initiatives in a fast-paced environment, delivering weekly and monthly analytical outputs with high organization and proactive communication.

IT Manager | AUG | Dubai, UAE 2020 – 2023

- Maintained service and project tracking data across enterprise systems, ensuring accurate reporting, schema integrity, and documentation aligned with data warehouse best practices.
- Generated performance dashboards and analytical reports for operational review, supporting business stakeholders with clear data-driven insights.
- Identified data quality inconsistencies and process improvement opportunities through structured data analysis, reducing reporting errors.
- Coordinated with cross-functional teams to manage multiple initiatives simultaneously, ensuring timely issue resolution and consistent data governance.
- Facilitated adoption of standardized reporting methodologies, improving data model alignment across operational and IT functions.

Technical Support Engineer | Al Wafaa IT Solutions | Dubai, UAE 2017 – 2020

- Executed ETL processes — extracting, transforming, and loading data from multiple sources — to support analytics and enterprise reporting pipelines.
- Wrote and optimized complex SQL queries with advanced joins and aggregations to perform data analysis, reconciliation, and audit validation.
- Built interactive Power BI and Tableau dashboards to visualize KPIs, operational performance trends, and schema-level metrics.
- Documented data workflows, transformation logic, and ingestion processes; automated recurring reports to reduce manual effort and improve analytical efficiency.

Senior Technical Support Associate | Wipro | Mumbai, India 2010 – 2012

- Maintained service logs, structured datasets, and documentation to support data analysis, service delivery tracking, and continuous improvement initiatives.
- Assisted in generating analytical reports and communicating insights to business stakeholders to support operational decision-making.
- Applied organizational best practices to manage reporting tasks across multiple concurrent service streams in a high-volume environment.
